

Gabriel Teles Bastos

Education

Information Systems, Estácio Feb/2014 - Dec/2017

Bachelor's degree

Ability to work with innovation, planning and information management and technology infrastructure aligned to organizational strategies as well as the development and evolution of information and communication infrastructure systems, both applied to organizational processes.

Work

Developer, PDVend Jan/2016 - Now

My experience at PDVend is based on building webapps using Ruby on Rails, HTML, SASS and Angular.JS. I've also implemented desktop solutions in Node.JS + Electron, Android apps in custom hardware and even embedded systems in C.

Trainee, Supreme Federal Court Jul/2015 - Feb/2016

Maintenance in legacy software with Java, JSP, RichFaces, CSS and Javascript, running JBoss 4 and 6, using Jenkins and Sonar.

Participation in the reference architecture team, developing microservice-based software using DDD, Java, Spring, Oracle, MongoDB, Elasticsearch, RabbitMQ, Node.JS, Gulp, Bower, Sass, Angular.js and Angular Material.

Senior Developer, Uninacional Aug/2015 - Nov/2015

At Uninacional I was the leader of the software development team. I've worked basically with building and maintaining websites & web-based solutions in basic LAMP stack and helped to provide IT services to 23 national and 2 international colleges.

Developer, Aprendizado Online Aug/2014 - Nov/2015

I've worked with a lot of things at Aprendizado Online, from browser-based educational games, educational platforms development, software integrations, to handling monetary calculations and generating management dashboards. I've also setup some high performance VPSS and physical machines.
